

Become an Angel

Since our first appearance in Laramie, the members of Angel Action have been asked many times for information on how to stage similar peaceful demonstrations.

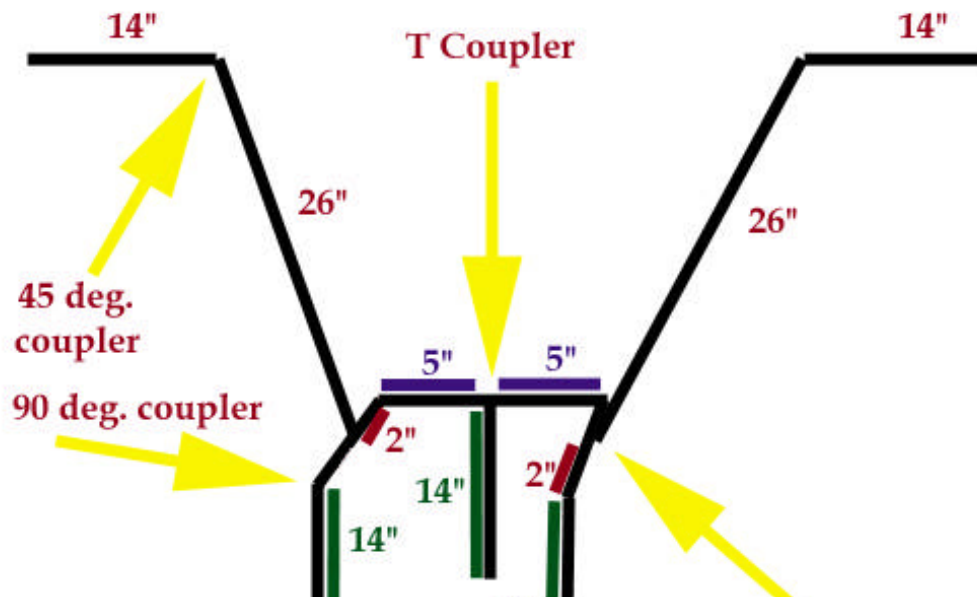

We provide you with the following information with the desire that other people worldwide will take up our philosophy of peace in their demonstrations.

Building the Costumes:

The Framework:

For the frames of each costume you will need twelve feet of 1/2" white PVC pipe and the following fittings:

- 2 couplers angled at 45 degrees.
- 1 T-coupler
- 2 T-couplers, with threading on the joint at the bottom of the T
- 4 couplers angled at 90 degrees.
- 2 threaded pipe ends (one end smooth female end and the other threaded male end)

14" 

The bottom section forms a shoulder harness. Fasten with tape for added stability.

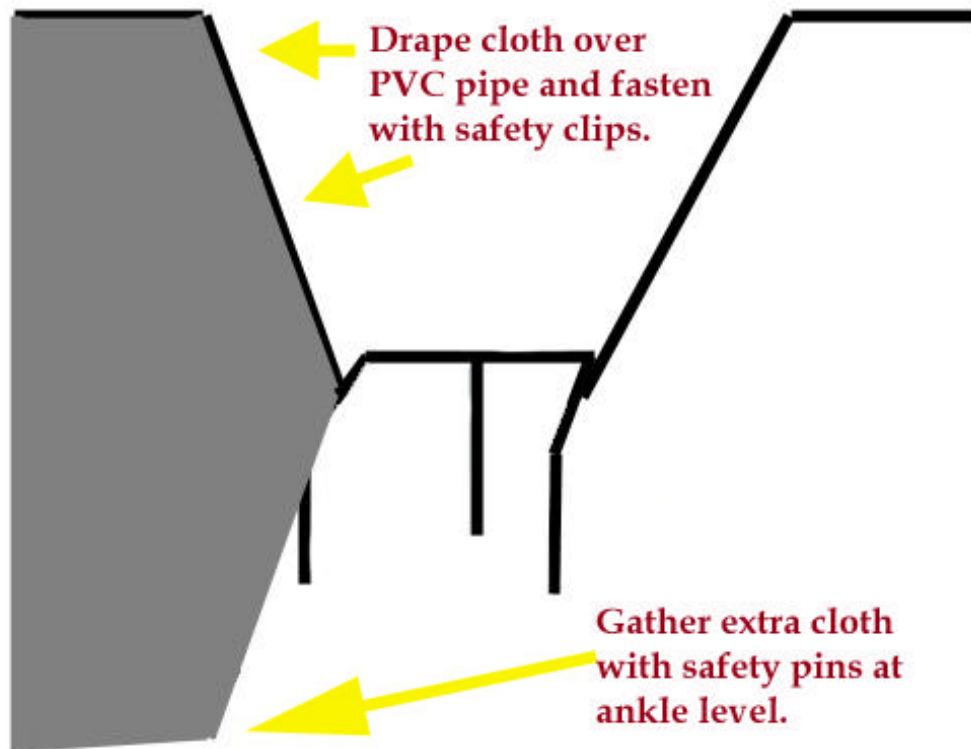

Wing pipe with screw end attaches to the T coupler with the threads

Black lines indicate PVC Pipe

Colored lines indicate measurement points.

The Covering:

Use two standard sized flat (not fitted) sheets. The first is split down the middle (the long way) and draped over the wings. Cut a hole in the middle and drape it over the head of the angel and their body. Gather extra cloth with safety pins so that it does not drag and get dirty. In keeping with the spirit of the angels, please don't decorate the costumes with words or slogans. The who point is to send a message with the image, not with words or slogans. Questions? [Email an Angel.](#)

Black lines indicate PVC Pipe
Grey panels represent sheets.
